#FightForOurLives

Dear General Election Candidate

Anyone who has survived the trauma of a brain injury or stroke should be able to get the support they need to rebuild their shattered lives, no matter where they live.

But years of underinvestment in community rehabilitation services and a failure to implement national policy have left thousands of survivors and families feeling lost and abandoned on their recovery journey.

When elected, we are asking you to uphold the human rights of brain injury survivors under the UN Convention on the Rights of Persons with Disabilities, and give them the chance to live life to its full potential.

You can do this by committing in the Programme for Government to deliver on the **Neuro-rehabilitation Framework 2019 – 2021**.

FIGHT FOR THE LIVES OF BRAIN INJURY SURVIVORS BY:

1. Raising awareness of the rehabilitation needs of people with a brain injury and their families in the Dáil.
2. Advocating to prioritise funding for long term rehabilitation services for people with brain injury, to address the massive gaps and postcode lottery for services.
3. Making Acquired Brain Injury Ireland financially sustainable, so that we can continue to deliver in the community.
